## Disclaimers

This list is by no means intended to be inclusive of all parts, services and sources available. We have tried to pick out parts and services that are not always readily found or where the source is relatively unknown.

Considerable effort was made to insure accuracy but with this much data it is possible that a few errors may have crept in, either from information supplied by vendors or our own errors. For errors that may occur, we apologize. As always, the buyer should assume responsibility to carefully check with the vendor for part number accuracy before purchasing.

Due to space limitations, we have not always included supplier part numbers where there are several sources. MF part numbers are used for reference only and should not be construed to mean that the parts are supplied by MF. MF may sometimes use their own replacement numbers and not the original found in original Ferguson or MF parts books. Some of these parts may fit other models not mentioned.

Inclusion of this information in *Ferguson Furrows* should not be construed as a FENA endorsement of any manufacturer, wholesaler, retailer, or service provider. We simply make this information available as a service to our members. Neither FENA nor its members make any claims, stated or implied, on behalf of any manufacturer, wholesaler, retailer, product, or service provider listed herein.

If any reader has information about other parts that would be appropriate for inclusion in this list for future revision, please contact the editor.

Our special thanks to Bob Sybrandy of Lansing, MI, for his invaluable assistance in gathering this data.
